(Picture 4 – Sites)

*** About Sites:

- Each site represents separate installation and database is created for each.
- Doors, Users, Access levels and Departments are configured for each site separately.
- Any type of card created in one site won't work on a reader that is configured in other site.
- The Operators and system settings are shared among all sites.

6. Adding new site:

- Click on "Add new" button, type desired site name, click on "Save" button when finished
- Select the site from the list and click "Open" to make the site active.

7. Login screen will appear, type username and password (default: admin/admin) to enter the software
