

1. Ensure the Product Builder is closed on the PC and the Product Builder CD or Product Builder USB stick is removed from the drive.
2. Download the zipped folder and save to your desktop
3. Unzip the folder by right clicking on the zipped file and choosing Extract All.

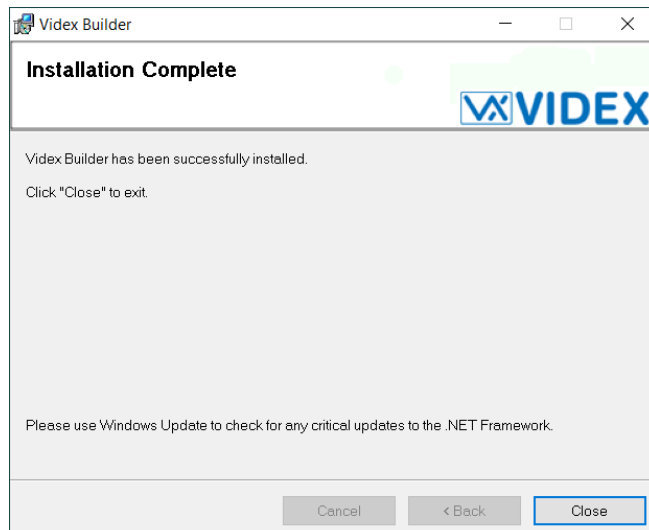

4. Run the setup program by double clicking setup.exe

File description: Setup
 File version: 10.0.30319.1
 Date created: 09/05/2019 11:14
 Size: 418 KB

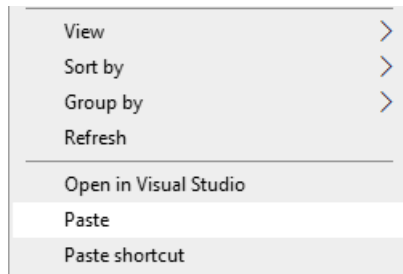

5. Follow the setup instructions to complete the setup.

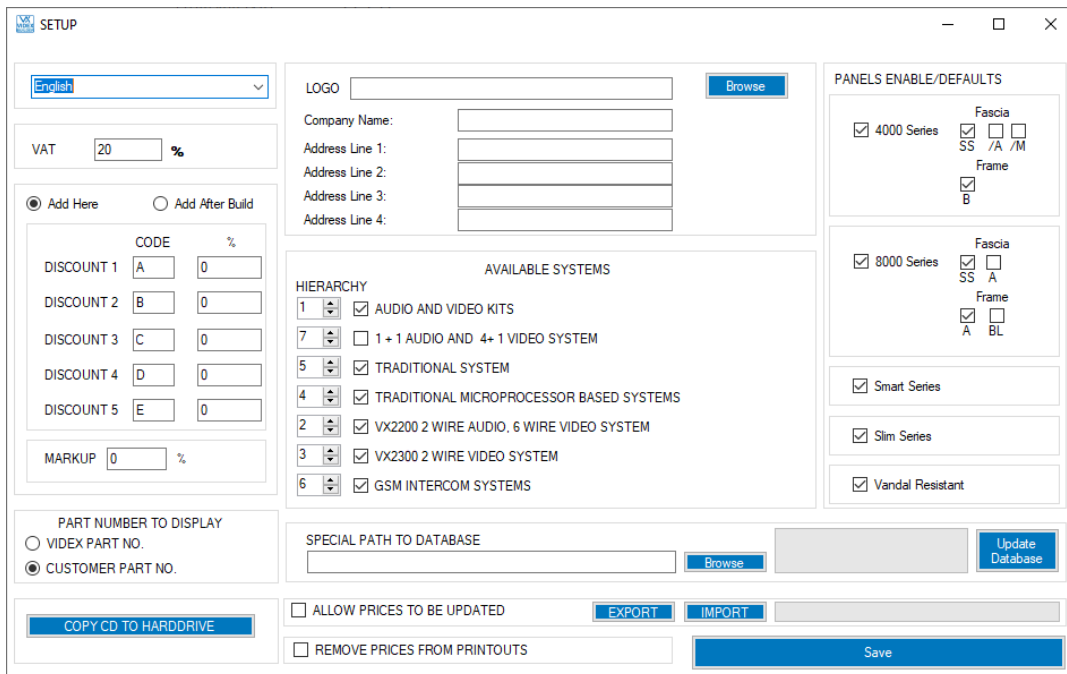

- We need to copy the VXRoot folder to the route of the C: drive. Right click on the VXRoot folder and select copy

- Go to the route of the C: drive and right click and select paste.

- Finally, run the Product Builder program and from the main form select SETUP

- Click on 'COPY CD TO HARDDRIVE' and in the 'Browse for Folder' click OK. The transfer of files will take a while.

- Once the transfer is complete you can then delete the VXRoot folder from the C: drive and also delete the downloaded folder (For the zipped and unzipped) as these are no longer required.
